Dear Susie:

I wanted to thank you and your team for a job well done with the 3 phase fence project at the Blue Bell Aquatic Center.

Running an Aquatic Facility, you will find that chlorine and chemicals are both our friends and our enemies. We had a beautiful metal fence surrounding our facility, and over the past 10 years had to sandblast and recoat it two different times. As time drew close to sandblast and recoat once again, the BBAC team started searching for an alternative fence product that would withstand our elements. Upon research, the team stumbled on to Fiber Fence.

What an amazing product. Working with you and your team to understand your product, test your product in our environment, and get the project bid and complete was an easy accomplishment.

The City of Brenham BBAC staff that worked closely with your team has been extremely impressed and complimentary on the quality of the Fiber Fence. I think that quality became obvious when the project came in on and under budget. I also think it is especially impressive considering the tight schedule sometimes brought upon us due to weather. Your staff was professional and very easy to work with.

The BBAC received new fencing around the exterior of our facility. We used privacy fencing, rolling gates, front entrance gates, and studded post fencing. Because the fence was installed in 3 phases, there was concern of the fence appearing as one unit and one color. We are excited to say the fence installed day one, looks as good as the last piece to be installed. We are excited that this is our forever fiber fence and the last one we will have to install/paint in the next century.

Please pass on my thanks to the Fiber Fence staff for a job well done.

Many thanks,

Tammy Jaster
